230V WIRING
8 light points + 1 dimmable

VELBUS-WIRING
At 7 locations you can install up to 8 pushbuttons each.
At 1 location you can install the pushbutton/timer module (LCD panel).

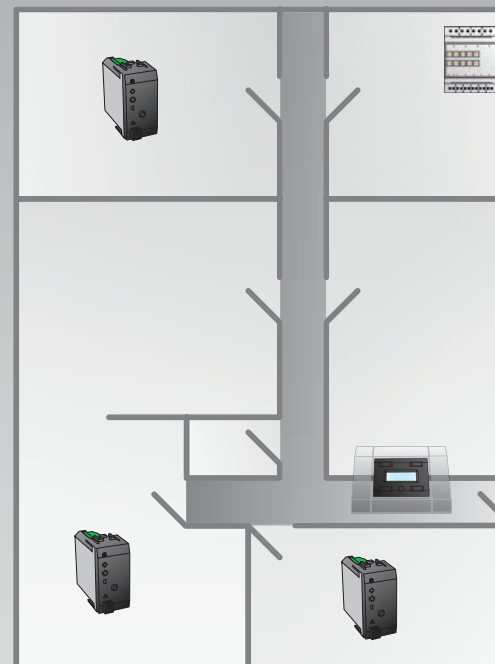

POSSIBILITIES WITH STARTER PACK BAT2

- in 8 rooms you can configure the light as:
 - on/off
 - delayed on/off
 - staircase timer switch
 - timer with flashing effect
 - ...
- at 7 locations it is possible to install 8 pushbuttons from any manufacturer (possibly with feedback).
- the LCD panel can be connected anywhere to the bus wiring and can be controlled remotely via IR.
 - feedback on every pushbutton
 - possible to use weekly programs
 - 8 pushbuttons on 2 pages
 - check the status of the bedroom lights from the living room (using feedback)
- make all pushbuttons child-safe by introducing a time delay
- use all pushbuttons to control all light points or a combination
- switch on the bedroom lights at a certain time every working day
- anywhere on the Velbus® you can install a panic button to switch on all the lights immediately
- you can use 1 button e.g. to switch off ALL lights
- your complete installation can be configured via your PC
- in the living room, you can configure the light as:
 - dimmable
 - slowly on
 - create different atmospheres
 - dimmable with memory
 - ...
- can be extended for:
 - shutter control, temperature control (thermostat), LED dimming, entrance detection (alarm)...
 - controllable via PC, iPod and iPhone through homecenter software (www.homecenter.be)
 - future Velbus® modules
 - ...

OPTIONAL EXTENSION

PROGRAMMABLE THERMOSTAT

with temperature sensors (and valve control) in 3 rooms
