VMB2LEDDC 2 CHANNEL PWM LEDSTRIP DIMMER (0 TO 10 V)

The **VMB2LEDDC** is the **new and improved Velbus PWM dimmer** (before VMBRGBDC). The PWM frequency has been increased to 500 Hz. The dimmer is now provided with short circuit and thermal protection. The connectors are sturdier and larger. The maximum current has been increased to 8 A per channel (100W@12V or 200W@24V).

Attention: two output channels per module.

To be used in combination with the **VMB4DC 4 channel 0(1)...10V controller** (effective control tension 0.5-9.5 VDC).

Now in stock!
