

FAQ: HOW CAN I USE THE ASTRONOMICAL CLOCK?

For a general explanation about Velbus, please consult the installation guide on www.velbus.eu.

Always use the latest version de Velbuslink, freely downloadable on www.velbus.eu > Support > Downloads.

1 QUESTION

How can I automate actions (eg. blinds up or down) at sunset or sunrise?

2 ANSWER

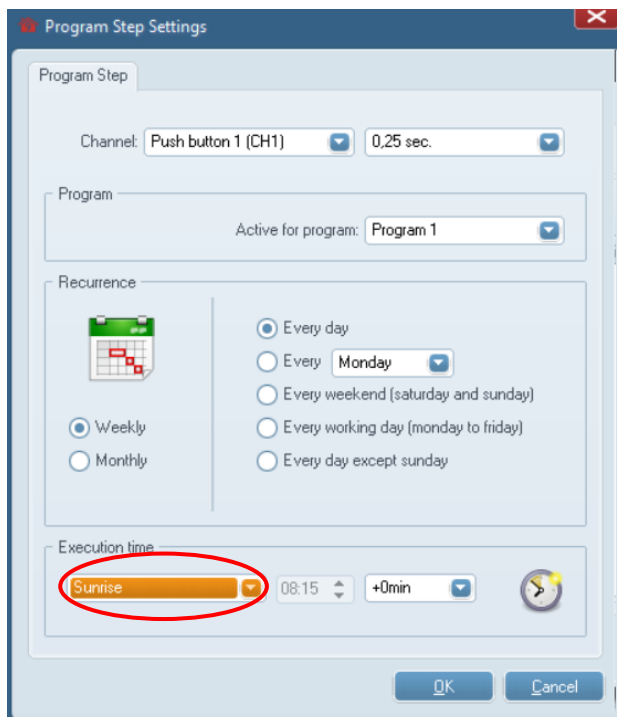

Proceed as follows:

1. Make an action with a (virtual) push button as initiator, and the channel to be commanded as subject. Eg. in order to have a blind go up, create the following action:

(For a general explanation about virtual buttons, cfr. the Velbus Installation Guide: Part 2, Programming on www.velbus.eu.)

2. Make a program step that activates the push button at sunrise or sunset. (For a general explanation about program steps, cfr. the Velbus Installation Guide: Part 2, Programming on www.velbus.eu.)

At the bottom, under “Execution time”, sunrise or sunset can be selected.

Do not forget to synchronise (write) the changes. At the next sunrise or sunset the (virtual) push button will be activated, and the action connected to it will be executed.
